

STORY W01. PERSON OVERVIEW

As a user

I want to be able to see the overview of persons
so that I can see who is registered.

WIREFRAMES:

ACCEPTANCE CRITERIA:

- From the home page, I should be able to navigate to the user overview page
- From the overview page, I should be able to navigate back to the home page
- In the overview, a line is shown for each registered user
- For each user, following fields should be visible: email, firstname and lastname

TECHNICAL DETAILS:

- Put the *domain* and *user interface* classes in separate projects
- Disable *scriptlets* using a `web.xml` file.
- Deploy your application on the server (`java.cyclone2.khleuven.be:38034/manager`)
(user: admin, password: dynadmin)

- Domain classes:
